Issue Tracking & SLA

Support Model

Severity level	Time to resolve	Deliverables	Description
Sev-1	2 Hours	Issue / Resolution Tracker	The Issues will be raised, maintained and tracked using client's tracker.
Sev-2	4 Hours		
Sev-3	8 Hours		
Sev-4	24 Hours		
Service Request	24 Hours		
Service Request for Restore	Restore to start in 6 hours, after all conditions are met.	Timesheet	The resources will maintain the timesheet for the number of hours put in for the request raised by the client IT team.
Service Request for Backup	48Hours		

Level 1 Support – **CFT Consulting team will function as the client offshore team.** Users will login their queries onto the Helpdesk/ Ticket Management System/Phone Call/Email and will be acknowledge immediately. CFT's offshore team will function as an extended support arm of client's IT team and acknowledge these issues immediately within (0mints to 30mints).

- Time & Material
 - Project cost will be a function of the total project time relative to the resources deployed

- Fixed Price (Project-Based)
 - Offered when scope and specifications are clearly signed off
 - This option eliminates most client risk

- Build & Operate Managed Service
 - This is our signature service. Customers get the most for one fixed price.
 - We understand the IT needs, assess the team size and perform all the identified services for one fixed price
